

March 2, 2017

Dear Colleague:

I am writing to tell you about Dr. Victor M. Pedro and his innovative program for treating a broad range of medical conditions. Some years ago, Dr. Pedro developed a treatment program called Cortical Integrative Therapy, or CIT. Using non-invasive and painless forms of external stimulation, Dr. Pedro often either partially or fully resolves the underlying causes of a patient's brain-based injury or disorder.

I have referred a number of my patients to Dr. Pedro for treatment, and I can tell you that his clinic delivers real results. Dr. Pedro has successfully treated a variety of complex cases for which there is no alternative viable treatment in our community.

Simply stated, Dr. Pedro has success where no one else does. I highly recommend that you consider using his services for those patients who have brain-based injuries or disorders that have been resistant to treatment.

Thank you.

Dr. Ralph F. Santoro
